

TALLER: PROGRAMADOR JUNIOR
TEMA: PROGRAMACION ORIENTADA A OBJETOS
PRACTICA: 7
NOMBRE: IVONNE HERNANDEZ BAUTISTA
FOLIO: 15416TV14
FECHA: 18/11/22

This screenshot shows the Visual Studio Code editor with the file RecibeMascota.java open. The Explorer sidebar on the left shows the project structure for 'ESTETICA', including folders like .vscode, bin, lib, and src, and files like App.java, RecibeMascota.java, and README.md. The main editor area displays the following Java code:

```
1 public class RecibeMascota {  
2  
3     private String perro;  
4     private int edad;  
5     private String raza;  
6     private String tamano;  
7     private String dueno;  
8  
9     public RecibeMascota(String perro, int edad, String raza, String tamano, String dueno) {  
10         this.perro = perro;  
11         this.edad = edad;  
12         this.raza = raza;  
13         this.tamano = tamano;  
14         this.dueno = dueno;  
15     }  
16  
17     public String getPerro() {  
18         return perro;  
19     }  
20  
21     public void setPerro(String perro) {  
22         this.perro = perro;  
23     }  
24  
25     public int getEdad() {  
26         return edad;  
27     }  
28  
29     public void setEdad(int edad) {  
30         this.edad = edad;  
31     }  
32  
33     public String getRaza() {  
34         return raza;  
35     }  
36 }
```

This screenshot shows the Visual Studio Code editor with the file RecibeMascota.java open, displaying the continuation of the Java code from the previous image:

```
31     }  
32  
33     public String getRaza() {  
34         return raza;  
35     }  
36  
37     public void setRaza(String raza) {  
38         this.raza = raza;  
39     }  
40  
41     public String getTamano() {  
42         return tamano;  
43     }  
44  
45     public void setTamano(String tamano) {  
46         this.tamano = tamano;  
47     }  
48  
49     public String getDueno() {  
50         return dueno;  
51     }  
52  
53     public void setDueno(String dueno) {  
54         this.dueno = dueno;  
55     }  
56  
57     @Override  
58     public String toString() {  
59         return "RecibeMascota [perro=" + perro + ", edad=" + edad + ", raza=" + raza + ", tamano=" + tamano + ", dueno=" + dueno + "];"  
60     }  
61  
62  
63  
64 }
```
